

Die ersten Primvierlingsdrillinge

The first triples of prime quadruples

Jimmy Brüggemann
info@ymmij.de

22. Dezember 2020

We compute triples of prime quadruples.
Wir berechnen Drillinge von Primvierlingen.

A **prime** is a positive integer with exactly two positive divisors.

Eine **Primzahl** ist eine natürliche Zahl mit genau zwei positiven Teilern.

A **prime quadruple** consists of four consecutive primes (p_1, p_2, p_3, p_4) , $p_1 < p_2 < p_3 < p_4$ with $p_4 - p_1 \leq 8$.

Ein **Primvierling** besteht aus vier aufeinanderfolgenden Primzahlen (p_1, p_2, p_3, p_4) , $p_1 < p_2 < p_3 < p_4$ mit $p_4 - p_1 \leq 8$.

For $p_1 > 10$ we have

Ist $p_1 > 10$, so gilt

$$\exists n \in \mathbb{N} : (p_1, p_2, p_3, p_4) = (10n+1, 10n+3, 10n+7, 10n+9).$$

Thus instead of (p_1, p_2, p_3, p_4) we only write its **short number** n .

Statt (p_1, p_2, p_3, p_4) schreiben wir nur ihre **Kurzzahl** n .

A **triple of prime quadruples** consists of three prime quadruples with a (minimal) distance of 120:

Ein **Primvierlingsdrilling** besteht aus drei Primvierlingen im (minimalen) Abstand von 120:

(p_1, p_2, p_3, p_4) and/und $(p_1+120, p_2+120, p_3+120, p_4+120)$ and/und either/entweder $(p_1+30, p_2+30, p_3+30, p_4+30)$ or/oder $(p_1+90, p_2+90, p_3+90, p_4+90)$.

Displayed is the short number of the smallest prime quadruple in the appropriate color. Thus **282.005.261.77** represents the three prime quadruples

Wir notieren die Kurzzahl des kleinsten Primvierlings in der entsprechenden Farbe. **282.005.261.77** steht also für die drei Primvierlinge

((282.005.261.771, 282.005.261.773, 282.005.261.777, 282.005.261.779),
(282.005.261.801, 282.005.261.803, 282.005.261.807, 282.005.261.809),
(282.005.261.891, 282.005.261.893, 282.005.261.897, 282.005.261.899)).

The number of **prime numbers** $\pi(x)$, of **prime quadruples** $\pi_4(x)$ (without (2, 3, 5, 7) and (3, 5, 7, 11)), of **twins** $\pi_{4,2}(x)$, of **triples** $\pi_{4,3}(x)$, of **quadruples** $\pi_{4,4}(x)$, and of **quintuples of prime quadruples** $\pi_{4,5}(x)$ less or equal than x :

Die Anzahl der **Primzahlen** $\pi(x)$, der **Primvierlinge** $\pi_4(x)$ (ohne (2, 3, 5, 7) und (3, 5, 7, 11)), der **Primvierlingszwillinge** $\pi_{4,2}(x)$, der **Primvierlingsdrillinge** $\pi_{4,3}(x)$, der **Primvierlingsvierlinge** $\pi_{4,4}(x)$ und der **Primvierlingsfünflinge** $\pi_{4,5}(x)$ kleiner gleich x :

x	$\pi(x)$	$\pi_4(x)$	$\pi_{4,2}(x)$	$\pi_{4,3}(x)$	$\pi_{4,4}(x)$	$\pi_{4,5}(x)$
